

CABOT

2007 Annual Report

FAST FACTS

7,400

Number of patients seen annually at Cabot Westside Health Center

21,000

Number of annual visits by patients to Cabot

7

Percentage of patients at Cabot with private health insurance

Timothy Little, M.D., Medical Director

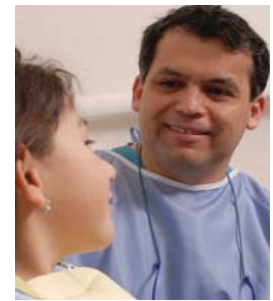

Cabot Westside Health Center's mission is to provide quality, culturally sensitive, bilingual/Spanish health and dental care and health education services to patients, regardless of their ability to pay.

Improving the Health of Our Community

Cabot has provided services to those in need for more than 100 years

Cabot Westside Health Center, an outpatient community health center, fills a unique niche as the greater Kansas City area's only full-service, bilingual/Spanish, comprehensive health and dental facility.

Cabot's patients—predominantly poor, working class, uninsured Hispanic females—struggle with the same afflictions that plague the nation: obesity, increasing rates of diabetes and cardiovascular disease, and the need for mental health services.

Orlando Silva, D.D.S., Dental Director

Patients often come to Cabot due to financial issues, a lack of insurance, or a preference to communicate with health care professionals in Spanish. Hispanics and residents of Kansas City's Westside community and the greater Kansas City area find their primary health, dental, and health education needs met in a culturally sensitive, bilingual environment.

Cabot provides comprehensive health and dental services for its patients, including:

- Baby and child health care
- Women's health care
- Adult medicine
- Preventive care
- Laboratory, medication assistance, and case management services
- Comprehensive dental services for adults and children

Cabot relies on a variety of funding sources, including the City of Kansas City and Jackson County in Missouri and the federal government, as well as gifts and grants from individuals, foundations, and corporations.

Challenges and Opportunities

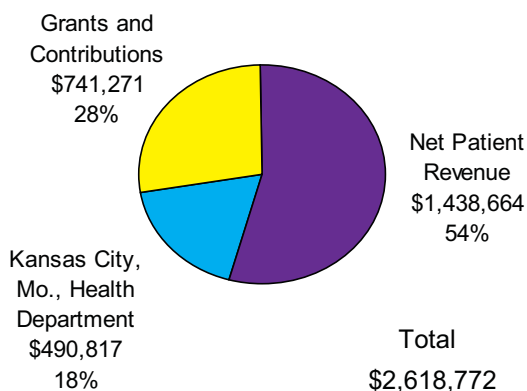

Rafaela Herrera, M.D.

Cabot is committed to providing quality, bilingual/Spanish medical and dental care to the greater Kansas City area's Hispanic and underprivileged communities.

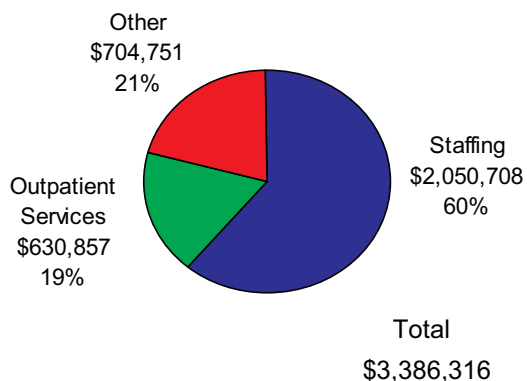

One of the most critical issues Cabot faces is the ongoing effort to balance this commitment with the increasing demands for and rising costs of care.

In 2007, Cabot saw an 11 percent increase in self-pay patients. Services for these patients are provided on a sliding scale, based upon the patient's income. Cabot pays the remaining, discounted portion of the charges, and accrued more than \$1 million in charity care expenses in 2007.
