

# *Dual Diagnosis and Awareness Recovery Program*

## **Program Overview**

Cushing Memorial Hospital's Dual Diagnosis and Awareness Recovery program is an inpatient program specializing in psychiatric and substance abuse diagnoses.

The program emphasizes the integration of treatment of major Axis I and II illness in addition to the foundations of addiction awareness and recovery.

### **Dual Diagnosis and Awareness Recovery Program includes:**

- Psychiatric care
- Medication and diagnostic evaluation
  - Family education and support
- Psychological and cognitive evaluation
  - Individual, group, and family therapy
    - Individual case management
    - Motivational interview

### **Our Care Team**

Our multidisciplinary care team is comprised of psychiatrists, master level social workers, licensed professional counselors, registered nurses, case managers, and psychiatric technicians.

### **Patient Eligibility**

Adults age 18 or older that meet criteria of Axis I or II diagnosis and a substance use disorder are eligible for the program. Most insurance plans are accepted including Medicare.
