

# Free Memory Screenings

## *Offered through Saint Luke's Brain Fitness Center*

Adults—including those with memory concerns, a family history of Alzheimer's disease, or a desire to establish a baseline score—may benefit from a memory screening administered by a qualified health professional at Saint Luke's Brain Fitness Center.

The face-to-face screening takes about 20 minutes and consists of a series of questions and tasks. The results do not represent a diagnosis and individuals who score poor-

ly, or who have normal results but are still concerned, will be advised to follow up with their physician or another specialist.

Educational materials about memory concerns, successful aging, and care-giving also are available.

Screenings are confidential and free of charge. The Saint Luke's Brain Fitness Center is located on the Saint Luke's Hospital campus at 4400 Broadway, Suite 100, Kansas City, MO 64111.

**An appointment is necessary—call (816) 932-2675 to schedule.**

*Saint Luke's Brain and Stroke Institute is a nationally recognized stroke and neurological treatment center, offering an integrated inpatient and outpatient program dedicated to improving outcomes in people with diseases of the brain, nervous system, and spine.
