# Home Care Services

*Saint Luke's Health System*

## Our Home Care Services

Saint Luke's Health System Home Care Services has been providing quality in-home care for more than 25 years. These home and community care services include the provision of skilled services, medical supplies, medications and a myriad of professional care and support services.

## A Full Range of Services

Saint Luke's Home Care Services offers a wide range of services, including:

- Skilled Nursing Services
- Social Services
- Home Infusion
- Rehabilitation Services
- Hospice

We also offer these specialty programs:

- Cardiac Home Care
- Orthopaedic Program
- Wound Care
- HomMed Monitoring System

## Professional Staff

Our care team members are among the most experienced in Kansas City. We can provide many kinds of care for you while you recuperate at home, including:

- Skilled nurses
- Home health aids
- Physical therapists
- Occupational therapists
- Speech therapists
- Social workers
- Chaplains
- Bereavement counselors
- Pharmacists

## Rehabilitation Services

Saint Luke's Health System Home Care Services has an excellent rehabilitation program that provides:

- Physical Therapy
- Occupational Therapy
- Speech Therapy

## Skilled Nursing Services

Saint Luke's Health System Home Care Services provides quality skilled nursing services in the home, including:

- Specialized Cardiovascular Services
- Specialized Wound Services
- Medical Surgical Services

## Home Pharmacy Infusion Program

Home Pharmacy Infusion Therapy is more than just a drug, a vascular device and a nurse. It's a comprehensive program designed to provide medical care to patients who require the administration of medications through infusion.

## Hospice

Saint Luke's Hospice provides quality compassionate care for people who are facing the final stages of any life limiting illness. When medical science can no longer add more days to life, hospice care can add more life to each remaining moment.

Hospice care neither hastens death nor prolongs life, but rather works in partnership with the each patient, his or her family and physician to help make the end of life a time of comfort, enrichment, resolution and love.

## The HomMed Monitoring System

The HomMed Monitoring System monitors vital signs of patients with chronic illnesses. A voice prompter walks a patient through a collection of vital signs, including heart rate, blood pressure, oxygen saturation, body weight, temperature, glucose, lung functions, and clotting time. It also can communicate in several different languages.
