# Mission Statement and Goals

Mission Statement and Goals are the foundation of any educational institution. They outline the purpose and ethos of the school. At Saint Luke’s Hospital School of Radiologic Technology, the mission statement is centered around providing high-quality education in radiologic technology, preparing students for professional success, and contributing to the advancement of medical imaging. The goals are specific, measurable, achievable, relevant, and time-bound (SMART) objectives designed to achieve this mission. They include enhancing curriculum, improving clinical placements, and increasing student satisfaction.

## Program Effectiveness

Program effectiveness is crucial for ensuring that the educational outcomes meet the standards and expectations. It involves regular assessment and evaluation to measure the quality of education provided. The school uses various methods such as student feedback, performance metrics, and external evaluations to gauge effectiveness. This process helps in identifying areas for improvement and maintaining the high standards of the program.

## Accreditation

Accreditation is a mandatory process that ensures the educational programs meet the quality standards set by regulatory bodies. The Saint Luke’s Hospital School of Radiologic Technology is accredited by the Joint Review Committee on Educational Preparation in Radiologic Technology (JRCERT), which is recognized by the American Medical Association (AMA) and the American Academy of Radiology (AAR). This accreditation is crucial for the school to be eligible for federal funding, student loans, and certification examinations.

## Faculty and Advisory Committee

The Faculty and Advisory Committee play a pivotal role in the governance and academic direction of the program. Faculty members are experienced professionals in radiologic technology, dedicated to teaching and research. The Advisory Committee consists of industry experts who provide advice on curriculum, clinical placements, and industry trends. Their input is essential in ensuring that the program remains relevant and up-to-date.

## Statement on Policy Changes

Policy changes are necessary to adapt to new regulations, technological advancements, and educational trends. The school updates its policies regularly to ensure compliance, meet new standards, and improve the educational experience. This includes changes in admission requirements, course offerings, and clinical placement regulations. Keeping students informed about these changes is crucial for maintaining transparency and readiness.

## Entrance Requirements

Entrance requirements are the criteria that applicants must meet to be considered for admission. These requirements can vary depending on the institution and the program. At Saint Luke’s Hospital School of Radiologic Technology, the entrance requirements include academic qualifications, such as high school graduation or equivalent, and sometimes additional prerequisites like specific coursework or minimum GPA. These requirements are designed to ensure that students are prepared for the rigor of the program.

## Observation Information

Observation information is crucial for applicants to gain insight into the program and its environment. This includes details about the curriculum, faculty, and clinical placements. Observations provide a realistic experience of what it is like to be a student in the program, helping applicants make an informed decision about their educational choices.

## Reflection Paper

Reflection papers are an integral part of the application process, allowing applicants to demonstrate their thought process, critical thinking skills, and commitment to the field of radiologic technology. The paper requires applicants to reflect on their career aspirations, personal qualities, and how they plan to contribute to the profession. It is an opportunity for applicants to articulate their motivations and demonstrate their readiness to pursue a career in radiologic technology.

## Degree Verification

Degree verification is a process that confirms the authenticity of a student’s academic credentials. It involves the verification of transcripts, certificates, and other academic documents. This process is essential to ensure the credibility of the educational background of professionals, especially in fields like radiologic technology where certifications and licenses are required for practice.

## Certification Exam Eligibility

Certification exam eligibility is a critical aspect for students planning to enter the workforce. Saint Luke’s Hospital School of Radiologic Technology prepares students to meet the eligibility criteria for certification exams, which are necessary for obtaining professional licenses and advancing in the field. The school provides resources and support to students preparing for these exams.

## Foreign Student Policy

Foreign student policies are designed to facilitate the educational experience of international students. These policies cover aspects such as visa requirements, enrollment procedures, and support services. Saint Luke’s Hospital School of Radiologic Technology offers comprehensive support to foreign students to ensure a smooth transition and a positive educational experience.

## Application Procedure

The application procedure outlines the steps an applicant must follow to apply for admission. This includes obtaining necessary documents, completing the application form, and submitting them along with required fees. The school provides clear guidelines to make the process accessible and straightforward for all applicants.

## Non-Discrimination Policy

Non-discrimination policies are in place to ensure fairness and equality in the educational opportunities provided. These policies prohibit discrimination based on race, color, religion, sex, national origin, disability, age, or sexual orientation. Saint Luke’s Hospital School of Radiologic Technology is committed to creating an inclusive environment for all students.

## Estimate of Costs

Estimate of costs provides potential students with an overview of the financial commitments involved in pursuing a degree. This includes tuition fees, books and supplies, and other expenses. Knowing these costs in advance helps applicants make informed decisions about their educational investment.

## Cancelation Refund Policy

Cancelation refund policy outlines the conditions under which tuition and other fees may be refunded. These policies are designed to protect both the school and the student, ensuring transparency and fairness in the refund process. Saint Luke’s Hospital School of Radiologic Technology aims to provide clear and straightforward refund policies.

## Refund Policy

The refund policy is a crucial component of any educational institution’s financial management. It details the circumstances and procedures for obtaining refunds. The policy ensures that students are aware of their rights and responsibilities regarding tuition and fees. Saint Luke’s Hospital School of Radiologic Technology provides a transparent refund policy to support students' financial planning.

## Drug Screen Testing

Drug screen testing is a standard procedure in many educational programs to ensure the safety and compliance of students. This testing helps to maintain a safe learning environment and ensure that students are clear of illegal substances. Saint Luke’s Hospital School of Radiologic Technology performs drug screen testing as part of its wellness and safety policies.

## SLH Criminal Background Check

SLH Criminal Background Check is a routine procedure to check for any criminal history that could impact the safety and licensing of students. This check is essential for ensuring that potential students meet the standards required for practice in the field of radiologic technology. Saint Luke’s Hospital School of Radiologic Technology conducts these checks to uphold the integrity of the profession.

## Health Insurance

Health insurance is a vital component of student life, providing coverage for medical emergencies and ensuring health and well-being. Saint Luke’s Hospital School of Radiologic Technology offers information on available health insurance options to support students' health needs.

## Program Description

Program description outlines the scope and content of the radiologic technology program. It details the courses offered, the skills developed, and the career pathways available. The program description is designed to provide a comprehensive understanding of what students can expect from their educational experience at Saint Luke’s Hospital School of Radiologic Technology.

## Skill Standards

Skill standards define the competencies and abilities required for successful performance in the field of radiologic technology. These standards are developed in consultation with industry partners to ensure that graduates are equipped with the necessary skills to excel in their careers. Saint Luke’s Hospital School of Radiologic Technology adheres to these standards in its curriculum and clinical placements.

## Student Responsibilities

Student responsibilities outline the expectations and obligations students have during their educational journey. These responsibilities include attending classes, meeting deadlines, and maintaining academic standards. Saint Luke’s Hospital School of Radiologic Technology emphasizes the importance of these responsibilities to ensure student success.

## Program Attendance

Program attendance is monitored to ensure that students are actively participating in their education. Attendance policies are in place to support academic success and to ensure that students are prepared for their future careers. Saint Luke’s Hospital School of Radiologic Technology maintains strict attendance policies to foster a disciplined learning environment.

## Academic Policy

Academic policy encompasses the standards and procedures governing academic activities. It includes grading scales, academic requirements, and other policies that maintain the academic integrity of the program. Saint Luke’s Hospital School of Radiologic Technology enforces these policies to ensure a fair and rigorous academic environment.

## Grading Scale

Grading scale is a system used to evaluate and report student performance. It provides a standardized method for assessing academic achievement. Saint Luke’s Hospital School of Radiologic Technology uses a grading scale that reflects industry standards and helps students understand their progress.

## Academic Requirements

Academic requirements are the specific criteria students must meet to complete the program. These requirements include course completion, GPA, and other academic standards. Saint Luke’s Hospital School of Radiologic Technology sets these requirements to ensure that graduates are prepared for the workforce.

## Clinical Education

Clinical education provides practical experience and exposure to real-world scenarios in the field of radiologic technology. It includes rotations and opportunities for hands-on learning. Saint Luke’s Hospital School of Radiologic Technology offers a variety of clinical placements to enrich the educational experience.

## Introduction

Introduction to Clinical Education sets the stage for the clinical education component of the program. It explains the objectives, benefits, and expectations of clinical rotations. Saint Luke’s Hospital School of Radiologic Technology emphasizes the importance of clinical education in developing practical skills.

## Clinical Rotations

Clinical Rotations are an integral part of the program, offering students the opportunity to apply theoretical knowledge in real-world settings. Saint Luke’s Hospital School of Radiologic Technology arranges these rotations with reputable healthcare facilities to provide students with a comprehensive learning experience.

## Special Rotations

Special Rotations are designed for students who wish to explore specific areas of radiologic technology in greater depth. These rotations allow students to focus on particular interests or career paths. Saint Luke’s Hospital School of Radiologic Technology supports students in pursuing their unique career goals.

## Graduation Requirements

Graduation requirements are the criteria that must be met to complete the program successfully. These requirements include academic performance, clinical experiences, and other specific conditions. Saint Luke’s Hospital School of Radiologic Technology outlines these requirements to ensure that graduates are prepared for the professional world.

## Degree Verification Form

Degree Verification Form is a document that certifies the completion of the educational program. It is an official record that verifies a student’s achievement and is essential for professional recognition. Saint Luke’s Hospital School of Radiologic Technology provides a comprehensive Degree Verification Form to support students in their career advancement.

## Application Checklist

Application Checklist is a comprehensive guide that lists all the necessary steps and documents required for the application process. It simplifies the application journey and ensures that students do not miss any important deadlines or requirements. Saint Luke’s Hospital School of Radiologic Technology provides this checklist to help students顺利 navigate the application process.
Mission Statement:

The program strives to maximize all potential resources to develop a broad-based education in medical imaging for its students. The school is dedicated to the promotion of educational excellence while maintaining the effective delivery of quality services that would enhance the physical, mental and spiritual health of a diverse population of patients and community members.

Goals:

Student Learning:

Goal # 1: The student will be clinically competent.

Outcomes:
1. The student will position appropriately.
2. The student will provide patient care.
3. The student will practice radiation protection.
4. The student will acquire all mandatory & elective competencies.

Goal # 2: The student will be didactically proficient.

Outcomes:
1. The student will pass required classroom courses
2. The student will identify anatomical structures for positioning
3. The student will successfully complete positioning & procedures lab courses.

Goal # 3: The student will be able to exhibit integrity & display importance of professional growth & development in the field of radiologic technology.

Outcomes:
1. Students will demonstrate professional behavior.
2. Students will display exemplary ethical conduct.
3. Students will determine the importance of continued professional development
4. Students will summarize the importance of attendance at professional meetings.

Goal # 4: The program will graduate entry level technologists.

Outcomes:
1. Students will pass the ARRT exam on the first attempt
2. Students will be employed 6 months post graduation
3. Students will complete the program
4. Students will be satisfied with their education
5. Employers will be satisfied with graduates performance
Goal # 5: Students will use critical thinking and problem solving skills.

Outcomes:
1. Students will manipulate technical factors for non-routine exams.
2. Students will adapt positioning for trauma patients.
3. Students will be able to use critical thinking skills for trauma patients.

Goal # 6: Students will communicate effectively.

Outcomes:
1. Students will use effective and oral communication skills with clinical staff and patients.
2. Students will practice written communication skills.

Program Effectiveness:
- After completing the program you will be able to:
  - Accurately integrate knowledge of anatomy, positioning and radiographic techniques to demonstrate structures on an image or radiograph.
  - Apply appropriate principles of radiation protection for patient, self and others.
  - Determine exposure factors to achieve optimum technical factors with a minimum of radiation exposure to the patient.
  - Examine images for the purpose of evaluating technique, patient positioning and other pertinent technical qualities.
  - Provide patient care essential to radiologic procedures by demonstrating knowledge and competency in assessment, critical thinking and delivery of an entry level skill set.
  - Exercise discretion and judgment in the performance of medical imaging procedures within the scope of practice of a radiographer.
  - Recognize emergency patient conditions and initiate life saving first aid.
  - Integrate knowledge from didactic and clinical experiences as a basis for making professional decisions

Accreditation:
The Joint Review Commission of Education of Radiologic Sciences (JRCERT) accredits the Saint Luke’s School of Radiologic Sciences. Graduates are eligible to apply to take the National Certification Examination to become Registered Radiologic Technologists.

Statement on Policy Changes

Because of constantly changing conditions and circumstances, the School of Radiologic Technology reserves the right to make changes in policy and procedures in the program as may be deemed necessary and appropriate.
To meet the requirements for application to the School of Radiologic Technology, all prospective students must possess a High School Diploma or High School equivalent and have the following required college pre-requisites:

- College algebra or higher math course
  - Must be completed prior to application deadline (January) and within 10 years of the application year.
- Human anatomy or human anatomy and physiology
  - Must be completed prior to application deadline (January) and within 10 years of the application year.
- Written or oral communication (English or Speech)
  - Must be completed prior to application deadline (January).
- Medical terminology
  - Must be completed by the start date of the program (June).

In addition, a prospective student must meet one of the following 3 requirements.

1. Applicant must possess an associate’s degree by the start date of the program (June)
2. Applicant must possess a bachelor’s degree by the start date of the program (June)
3. Applicant must be part of a 2+2 affiliation with participating colleges or universities to obtain a bachelor’s degree.
   Saint Luke’s School of Radiologic Technology has a 2+2 affiliation agreement with Northwest Missouri State University.

Elective coursework and/or degree completion coursework must be completed by the program start date (June). Suggested electives include:

- Arts and humanities
- Information systems
- Social and behavioral sciences
- Conceptual physics
- Chemistry

All coursework and degrees must be obtained from an approved institution of the Higher Learning Commission (HLC) and/or an approved Regional Accrediting Agency.

An overall GPA of 2.5 (cumulative of all post-secondary education) is required for acceptance.

All required coursework must be completed with a minimum “C” grade.

College Algebra CLEP testing is acceptable for math courses that exceed the 10-year limit. A score of 50 or better is required for this program.
OBSERVATION/JOB SHADOW

The field of radiologic technology is a unique environment that enables the student and/or technologist to encounter many different aspects of medical imaging. This program requires the prospective student to experience a 4-hour (four) observation/job shadow in the Diagnostic Radiology Department. The encounter allows the student a realistic first-hand look at radiologic technology as a career.

You may complete your job shadow at any hospital; however, you must have the observation site complete a letter, on letterhead from the institution where you observe. The documentation should include your name, the date and time you observed and must be signed by a chief technologist or instructor. This must be preformed during the application year by the application deadline (January).

To request a job shadow at Saint Luke’s, please call (816) 936-8709 or mwooldridge@saint-lukes.org. Observation hours are available on Fridays, 7:30 a.m. – noon.

REFLECTION PAPER

In order to ensure your commitment to the career of radiologic technology, this program requires the submission of a 2 page, typed reflection paper with application.

Please include the following topics in your reflection paper:
1. The role of the radiologic technologist
2. Radiographers interactions with the patient/level of patient care rendered
3. Radiographers exchange of communication with peers, physicians, and other health care professionals
4. Observations of different types of imaging examinations
5. Personal experience with medical imaging
6. Attributes that you possess that would match those needed for this profession

DEGREE VERIFICATION

A Copy of your Diploma (If completed by application date) or the Degree Verification form must be completed and submitted with your application.

CERTIFICATION EXAM ELIGIBILITY

The ARRT is required to evaluate the moral character of each radiology graduate candidate before they take the national board registry. The evaluation process assures the community that the applicant engages in moral, professional and ethical conduct set forth by the standards of the American Registry of Radiologic Technology.

There are three components that make up the evaluation process. The student must satisfy each of the following requirements:

The student must:

a. Attend an approved radiology program.

b. Pass a moral character evaluation.

c. Pass the registry exam.

Item "b" involves gathering information about the moral and ethical conduct on an applicant.
Portions of the information are acquired through answers to questions submitted by the graduate as part of their registry application process. Additional information, such as arrest records and convictions are gathered through the efforts of other professional agencies. The ARRT committee will review any and all additional information they receive on an applicant, and generate a response regarding their eligibility to take the national board registry. The committee meets three times a year. Therefore timing is everything.

- Any behavior that resulted in a conviction, a misdemeanor or a diversion, must be disclosed.
- Applicants with a prior felony conviction cannot apply to the program.
- If the incident occurred as a juvenile, contact the County Clerks office to confirm that the file has been sealed. If it was not sealed, the student must disclose the incident(s).
- Individuals with prior convictions must be approved by the ARRT through the Pre-Certification Eligibility process before the application can be considered for the program.
- Contact the ARRT and request a Pre-Application Review Process Package
- Or Contact the American Registry of Radiologic Technology (ARRT) by calling 1-651-687-0048 Ext. 544. The e-mail address is (arrt.com)

**INTERNATIONAL STUDENT POLICY**

**Determine if you will be considered an (international) foreign student**

Applicants are considered to be an international student if English is not their native language (or if English is one of the official languages of their native country but not necessarily the first language of the majority of the population).

Students who have already been enrolled in courses at other US academic institutions without the completion of an English proficiency test are still considered foreign when applying to the Saint Luke’s School of Radiologic Technology. English proficiency must be demonstrated prior to applying for the program.

**English Language Proficiency**

All international applicants for the Saint Luke’s School of Radiologic Technology whose native language is not English must demonstrate an established level of English language proficiency through the TOEFL (Test of English as a Foreign Language) format.

International applicants who are native citizens of the following countries do not have to submit TOEFL scores: United States, Great Britain, Ireland, Australia, New Zealand, or the English-speaking provinces of Canada.

Applicants from other regions not listed above do need to submit TOEFL scores.

Test scores must be original forms sent directly from the administering agency to the Saint Luke’s School of Radiologic Technology. Photocopies will not be accepted.
International (Foreign) Student Application Requirements

Students for whom English is a second language must satisfy all of the following requirements in order to apply for the Saint Luke's School of Radiologic Technology:

- An official score report from the Test of English as a Foreign Language (TOEFL) which evaluates how well you combine your listening, reading, speaking and writing skills.

<table>
<thead>
<tr>
<th>Internet-based TOEFL Scores</th>
</tr>
</thead>

<tr>
<td>Reading</td>
</tr>
<tr>
<td>Listening</td>
</tr>
<tr>
<td>Speaking</td>
</tr>
<tr>
<td>Writing</td>
</tr>
<tr>
<td><strong>Total Score</strong></td>
</tr>
</tbody>
</table>

- Proof of U.S. Citizenship or lawful permanent residency.

Foreign Education Credentials Evaluation (Transcript Evaluation)

All international applicants must have all foreign transcripts (high school and college) evaluated by World Education Services OR Educational Credential Evaluators. The evaluation must include course-by-course evaluation, grade evaluation, grade point evaluation, and indicate the degree earned in U.S. terms (bachelors, masters, etc.). An official copy of the evaluation is required.

Please note: Transcripts and grades earned outside of the U.S. must be evaluated, even if the transcript is written in English.

- Official Transcripts and Official Course by Course Evaluation of Foreign Transcripts by a U.S. Evaluation Service must be submitted with application.

All three of the above steps must be submitted by the application deadline.
APPLICATION PROCEDURE

The School of Radiologic Technology accepts applications yearly.

Applicant selection

This two-year program begins every June, with an application deadline of the second Friday of January each year. All application materials must be submitted by the application deadline for consideration as a prospective student.

The school accepts approximately 10 students each year. Each applicant is scored based on:

- Official transcripts/academic achievement
- Reference forms
- Previous health care experiences
- Observation/job shadow

Approximately 30 of the top-scoring applicants will be selected for an interview with the selection committee. The School of Radiologic Technology uses a behavioral-based interview process.

All applicants will receive notification by letter if they have been accepted into the program or not chosen for the current program.

Applicants offered acceptance must pass a criminal background check, drug test and TB test before final admission to the program.

Applicants must submit the following components:

- Application form
- $25 application fee (please make check payable to SLH School of Radiologic Technology)
- Official transcripts (high school and all post secondary colleges and universities*)
  All official transcripts must come from the honoring institution (Accredited Higher Learning Commission approved institution, university or college.) The application will not be processed until all transcripts are received. *final grades are required to process application
- Copy of diploma of earned degree or degree verification form
- Reference forms – mailed by the referrer in a sealed envelope
  Applicants must have two references submitted directly by the referrer. References should be from a professional who is not related to the applicant (ex. supervisor, manager, instructor or professor).
- Observation/job shadow documentation
  Must be on letterhead from the institution where the observation occurred and be signed by a chief technologists or instructor. (This must be completed during the application year.) The documentation should include your name and the date and time you observed.
SAINT LUKE’S HOSPITAL
SCHOOL OF RADIOLOGIC TECHNOLOGY

PROSPECTIVE STUDENT INFORMATION GUIDE

- Reflection Paper
  In order to ensure your commitment to the career of radiologic technology, this program requires the submission of a 2 page, typed reflection paper with application.

- Application Checklist

Mail all application components to:

Saint Luke's Hospital
4401 Wornall Rd.
Radiology Department
School of Radiologic Technology
Kansas City, MO 64111

SELECTION OF CANDIDATES

Each year there are more applicants than available positions, the following is the process for candidate selection:

1. The application process is point driven. The applicant's scores will be calculated from the following areas:
   A. Reference forms
   B. Official transcripts
   C. Healthcare experience
   D. Observation
   E. Reflection Paper

2. Applicants with the highest-ranking scores will be scheduled for an interview conducted by a panel of departmental and program officials. 30 candidates will be interviewed. 10 students will be selected.

3. A twenty-five dollar ($25) application fee is required before the application will be processed.

4. Applicants must meet the “Skill Standards” appropriate to Radiologic Technology as set forth by the school.

5. Applicants who are chosen for an interview will be scheduled to appear before the panel of departmental and program officials. The panel will use the Behavioral-Based Interview Process.

6. Rejection of an application can occur in any step of the application process.

7. Applicants will be notified with an acceptance or regret letter. The decision of the interview panel is final.

8. Applicants accepted into the program must pass a criminal background check, a drug test and TB test before their position is official.
NON-DISCRIMINATION POLICY

The Saint Luke’s Health System’s Radiology School does not discriminate against applicants or in the administration of its educational policies and procedures by reasons of sex, race, religion, color, handicap, age or national origin. The program adheres to the Fair Practices in Education as established by its accrediting agency the Joint Review Committee on Education in Radiologic Technology.

<td>$ 1,000.00 approx. (purchased through book distributor)</td>
</tr>
<tr>
<td>Uniform Fee</td>
<td>$ 200.00 approx.</td>
</tr>
</tbody>
</table>

Fees are subject to change.

1. Matriculation fee is to be submitted with acceptance letter.
2. Tuition payment schedules are due on the first day the program begins.
3. Tuition fee schedules must be completed prior to start date of program.
4. Books and uniforms must be purchased by the first day of the program.

All tuition must be paid in full by the January prior to graduation. Certificates and Grades will be held until all fees are paid in full. Please note: Saint Luke’s is not TITLE IV Funded.

ALL tuition and fees are subject to change annually with the approval of Administration.

CANCELLATION POLICY

Three-Day Cancellation: An applicant who provides written notice of cancellation within three (3) business day, excluding weekends and holidays, of executing the enrollment agreement is entitled to a refund of all monies paid.
REFUND POLICY

Students who withdrawal within the enrollment period (the first 4 weeks into the selected program) will receive a percentage of all tuition paid, based on the payment option selected by the student, less a $25.00 cancellation fee.*

* Refund is contingent upon tuition payments being current.

Students withdrawing from the program must issue a dated, written statement to the Program Director of the School of Radiologic Technology describing their intent to withdraw and request a refund. Students will receive a pro-rated refund 45 days after the written withdrawal letter is submitted to the program director. Refund will be in accordance with the above refund policy.

Books purchased for the School of Radiologic Technology program are considered a student expense and are not considered part of tuition.

No refund will be given to 3rd party payer.

Students that are dismissed from the program will not receive a refund.

DRUG SCREEN TESTING

Saint Luke’s Hospital requires all students to undergo a drug screen urinalysis test and pre-assessment physical. Saint Luke’s Employee Health will conduct the test at the expense of the program.

1. The student will sign a consent form for the drug screening. This action provides authorization to the employee health nurse to release the results of the test to Saint Luke’s Hospital and to the Program Director.

2. If the applicant refuses to sign the release form, the applicant will automatically be disqualified from the program.

3. If an applicant tests positive for illegal drugs, admission to the program will be denied.
Students that are enrolled in the program and give cause of suspicion of drug use will be required to undergo additional drug screen testing. If a student refuses the test or the test is positive, they will be dismissed from the program. Appropriate medical center personnel will be notified if the student tests positive for drugs.

**SLH CRIMINAL BACKGROUND CHECK**

*Individuals who are accepted into the program must consent to and pass a criminal background check before their position in the program is official. Individuals who have submitted a pre-certification application to the ARRT for a misdemeanor or a diversion conviction will be allowed to move through the application process. Acceptance into the program will be contingent on a favorable decision from the ARRT.*

**HEALTH INSURANCE**

Students are not eligible for health insurance through Saint Luke’s Hospital unless they are hired by the system as full or part-time employees.

The program *requires* that students obtain and maintain health insurance for the duration of the program. Students will be asked to sign affidavits indicating their compliance on this policy.

**PROGRAM DESCRIPTION**

The program of medical radiography is designed to prepare health care professionals who are skilled in the use of ionizing radiation for diagnostic purposes. To this end, a course of study is offered that will develop the skills necessary for working with patients and radiology equipment.

The curriculum provides instruction in both the classroom and clinic. The didactic component consists of sessions concerning the factual and theoretical basis of radiology. The clinical setting provides the opportunity for applying classroom knowledge in a supervised patient care environment.

The entire curriculum is outcome-based requiring mastery learning in all entry-level skills. Each student is provided with educational objectives that they are expected to achieve in specific time intervals for specific levels of accomplishment. This system provides a schema for efficient and productive learning.

The program is designed as a 2 year course of study. The radiography program is a full time, competency based program. *The program does not provide accommodations for part time students.* Students attend Monday through Friday, (40) hours per week, (8) hours per day. Academic and clinical instruction is based on 40 hours of required attendance. Students are provided several breaks, throughout the program.

The program begins every June and graduation is held in May.

The program utilizes a Semester-based curriculum. There are 6 semesters in the 24-month program (Summer, Fall, Spring).

Upon successful completion of the courses, the student qualifies for the National Certification Examination in Diagnostic Radiologic Technology. Passing of the examination awards the student with the title “Registered Radiologic Technologist."
SAINT LUKE’S HOSPITAL
SCHOOL OF RADIOLOGIC TECHNOLOGY

PROSPECTIVE STUDENT INFORMATION GUIDE

The program includes all courses recommended in the Curriculum Guide for Programs in Radiologic Technology, developed by the American Society of Radiologic Technologist.

SKILL STANDARDS

There are a number of physical, mental, aptitude and emotional skills, which are essential in the duties and responsibilities of a medical radiographer as well as a student in the School of Radiologic Technology program. Applicants must meet the following requirements.

1. The ability to manipulate portable imaging equipment and other medical/technical equipment.

2. The ability to physically operate all technical imaging equipment.

3. The physical ability to assist in lifting patients from a cart, bed, or wheelchair to the radiographic table.

4. The ability to lift, bend and stoop.

5. The ability to visually observe (see) the patient at a minimum of 20 feet. The ability to read the requisition in the execution of a radiographic procedure. The visual acuity to see the x-ray control panel.

6. Auditory perception is required in the care and management of the patient. The student must be able to respond to the auditory needs of the patient and also respond to the auditory communication of the physician(s), nurse(s) and co-worker(s).

7. The ability to orally communicate.

8. The ability to maintain an emotional state appropriate to function in times of stress and in emergency situations.

9. Possess the physical stamina (endurance) to maintain the 40 hours per week commitment to the program.

10. Possess the aptitude for reading comprehension and have basic knowledge of intermediate and college algebra.

11. The ability to perform CPR and emergency patient evacuation procedures.

12. The general health of the student should be sufficient for them to carry out all of the duties and responsibilities of a student radiographer.

13. The ability to perform multi-tasks assignments efficiently and with indirect supervision.

14. Have a basic understanding of computers operation, Windows operating systems and Internet.
STUDENT RESPONSIBILITIES

1. Check schedules for clinical assignments and class times.
2. Be on time for clinical assignments and classes.
3. Follow the school dress code at all times. Wear name badges and film badges. Lead markers should be immediately accessible at all times when in clinic.
4. Contact both the school and respective clinical site in the event you will be absent or late.
5. Review department protocols prior to performing any procedures.
6. Seek assistance from a registered technologist when performing all repeat examinations.
7. Demonstrate clinical competency prior to performing radiographic examinations independently.
8. Review clinical objectives and evaluation forms. Submit by established deadlines.
9. Stock radiographic rooms every morning at the respective clinical site.
10. Participate in all aspects of clinic education and demonstrate a willingness to help in any way possible. Students should be participating in all exams in the assigned rooms, regardless of any previously acquired competency test-out on.
11. Studying for academic classes during clinical education hours is not permitted.
12. Use “slow” times in clinic to practice positioning skills or complete clinical objectives.
13. Complete and submit competencies according to published schedule.
14. Tell your Clinical Instructor or Clinical Coordinator any exams or areas you need additional instruction or experience is needed.
15. Communicate to your Clinical Instructor, Clinical Coordinator or Program Director any problems, concerns or questions you may have.
16. Maintain a minimum of 80% in all courses.
17. Have access to a computer with Internet Capabilities.
PROGRAM ATTENDANCE

Students are encouraged to have regular and consistent attendance throughout the program. Students are required to make-up any subject material missed due to an absence. The student will contact the designated instructor for make-up materials if an absence occurs. Days off are the weekends and holidays.

ACADEMIC POLICY

GRADING SCALE
All clinical and didactic course work is given a grade based on the following scale:

<table>
<thead>
<tr>
<th>Letter Grade</th>
<th>Percentage Grade</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>93.0 - 100.0</td>
</tr>
<tr>
<td>B</td>
<td>85.00-92.9</td>
</tr>
<tr>
<td>C</td>
<td>80.0- 84.9</td>
</tr>
<tr>
<td>D</td>
<td>72.00-79.9</td>
</tr>
<tr>
<td>F</td>
<td>71.9 or less</td>
</tr>
<tr>
<td>I</td>
<td>Incomplete</td>
</tr>
</tbody>
</table>

ACADEMIC REQUIREMENTS

Each student is required to complete and obtain a minimum of an 80% average in all courses to remain in good academic and clinical standing. Failure to meet this requirement will result in dismissal from the program.

Academic grades are based on quiz scores, test scores, homework, lab tests, projects, and assignments. Clinical grades are based on: clinical competencies, film critique scores, room objectives, semester objectives, special area objectives, professional ethics evaluations, attendance, absenteeism, repeat sheets and punctuality.

NOTE: The first six weeks of the program is considered probationary, and a student that is not meeting academic or clinical standards can be dismissed at any time.
INTRODUCTION

The purpose of clinical education is for the student to acquire a knowledge base that effectively reflects appropriate insight and skill levels required in performing diagnostic medical imaging. It is a tool used to teach the student how to exercise and practice prudent radiation protection and safety for the patient, the student and co-workers. The student will be educated on the appropriate methods for critically thinking and reflecting on the delivery of care and the mastering of interpersonal communication. High levels of interpersonal skills are required to deal effectively with patients and other members of the health team at Saint Luke’s Hospital and affiliated clinical areas. The student will be guided and supervised in their clinical education. The clinical phase of the program is outcome-based. The student must demonstrate clinical competency in each area to successfully meet clinical standards of achievement. Each semester the student must complete a specific number of clinical competency evaluations. The evaluations are designed to integrate academic knowledge and the application of skills. All clinical competencies must be completed prior to graduation.

The clinical component of the program is a major part of the total educational process. The ultimate goal of the clinical education phase of the program is to provide the students with variety of radiographic procedures and to assist them in their development to be highly skilled medical radiographers. Students are expected to obtain diagnostic medical images with indirect supervision after they have proven competency in various procedures.

Consistent attendance is needed for clinical-skill building. Excessive absences will lower a student’s clinical grade and result in disciplinary action.

At the completion of the program, the student's skills must be equivalent to that of an entry-level radiographer. If they are not, the length of the program will be extended until the student documents clinical competency and demonstrates appropriate skills as a radiographer.

Clinical Rotations
2. Shawnee Mission Medical Center.
4. Saint Luke’s Trauma (Evening hours 12 p.m. to 8:30 p.m.)
8. Shawnee Mission Medical Center.
9. The Outpatient Imaging Center.
10. Bio Tech X-RAY
11. Truman Medical Center

Special Rotations
1. PET & Cardio Nuclear Stress Rotation.
2. Sonography.
4. Prep Room / Venipuncture/ EKG’s (CV Holding).
5. Cardiovascular Cath Lab.
7. Mammography.
8. Trauma Radiography.
9. Computed Tomography (CT).
12. Radiation Oncology.
GRADUATION REQUIREMENTS

In order to graduate and complete the program from the Saint Luke’s Health System School of Radiologic Technology, the student shall be able to:

1. Use oral and written communication.
2. Demonstrate the knowledge of human structure, function and pathology.
3. Anticipate and provide patient care and comfort.
4. Apply principles of body mechanics.
5. Apply appropriate critical thinking skills in the demonstration of patient care and procedures.
6. Perform algebraic functions relevant to the area of radiography.
7. Operate radiographic equipment and accessory devices.
8. Position the patient and/or imaging system to perform radiographic examinations and procedures.
9. Modify standard procedures to accommodate for patient condition and other variables.
10. Enter data into RIS; assign algorithms, QA images and charge procedures when using computerized radiography and digital imaging systems.
12. Determine exposure factors to obtain diagnostic quality radiographs with minimum radiation exposure.
13. Adapt exposure factors for various patient conditions, equipment, accessories and contrast media to maintain appropriate radiographic quality.
14. Practice radiation protection for the patient, self and others.
15. Recognize emergency conditions and initiate first aid and basic life support procedures (CPR).
16. Evaluate radiographic images for appropriate positioning and image quality.
17. Evaluate the performance of radiographic systems, know the safe limits of equipment operations, and report malfunctions to the proper authority.
18. Demonstrate knowledge and skills relating to quality assurance in medical radiography.
20. Demonstrate clinical competency that match the level of education.
21. Complete all make-up time per program policy and procedure.
22. All program fees must be paid in full before student is released from program.
23. All courses must be completed.
Degree Verification

Saint Luke’s School of Radiologic Technology requires verification of degree completion prior to the program beginning in June.

Please confirm what degree you will earn, the degree granting institution, along with the month and year you will earn this degree.
